Touch of Water

Memory-Mapping with AR and Sound Journal

ReCollab FCM · Multimedia University
Cyberjaya · 24 June 2026
Petua Air · 2026

On 24 June 2026, five teams walked this campus looking for water they remembered: rain that made them stop, the hiss of a coffee machine, mud after a storm. Each team chose a site, recorded its sound, and turned an object from it into a 3D model.

The dotted line is the path between them: the memory map of one afternoon. The sites are a few minutes' walk from here. Scan a team's code to see and hear what they found.
